

Anti-money Laundering Policy

Anti-money Laundering Policy

BlueFinTrading has policies in place to deter people from laundering money. These policies include:

Ensuring clients have valid proof of identification maintaining records of identification information;

Determining that clients are not known or suspected terrorists by checking their names against lists of known or suspected terrorists;

Informing clients that the information they provide may be used to verify their identity;

Closely following clients' money transactions. Not accepting cash, money orders, third party transactions, exchange houses transfer or Western Union transfers.

What is Money Laundering?

Money laundering is the act of hiding money obtained illegally, so the source appears legitimate. We adhere to strict laws rendering it illegal for us or any of our employees or agents to knowingly engage in or attempt to engage in any activities remotely related to money laundering. Our an-money laundering policies increase investor protection and client security services, as well as offer safe payment processes.

Money Laundering usually follows three stages:

Firstly, cash or cash equivalents are placed into the financial system;

Secondly, money is transferred or moved to other accounts (e.g. futures accounts) through a series of financial transactions designed to obscure the origin of the money (e.g. executing trades with little or no financial risk or transferring account balances to other accounts);

And finally, the funds are re-introduced into the economy so that the funds appear to have come from legitimate sources (e.g. closing a futures account and transferring the funds to a bank account).

Trading accounts are one vehicle that can be used to launder illicit funds or to hide the true owner of the funds. In particular, a trading account can be used to execute financial transactions that help obscure the origins of the funds. We direct funds withdrawals back to the original source of remittance, as a preventative measure.
